ORACLE
BARE METAL CLOUD SERVICE

Oracle PaaS is a comprehensive, standards-based, integrated combination of Oracle and open-source technologies that enable you to build, deploy, migrate, and manage a variety of application workloads in a secure environment. Oracle Database Cloud Service, Oracle Java Cloud Service, Oracle Mobile Cloud Service, Oracle Integration, and Oracle Visual Builder are a few examples of Oracle PaaS services.

Lift and Shift Automation to Oracle IaaS and PaaS

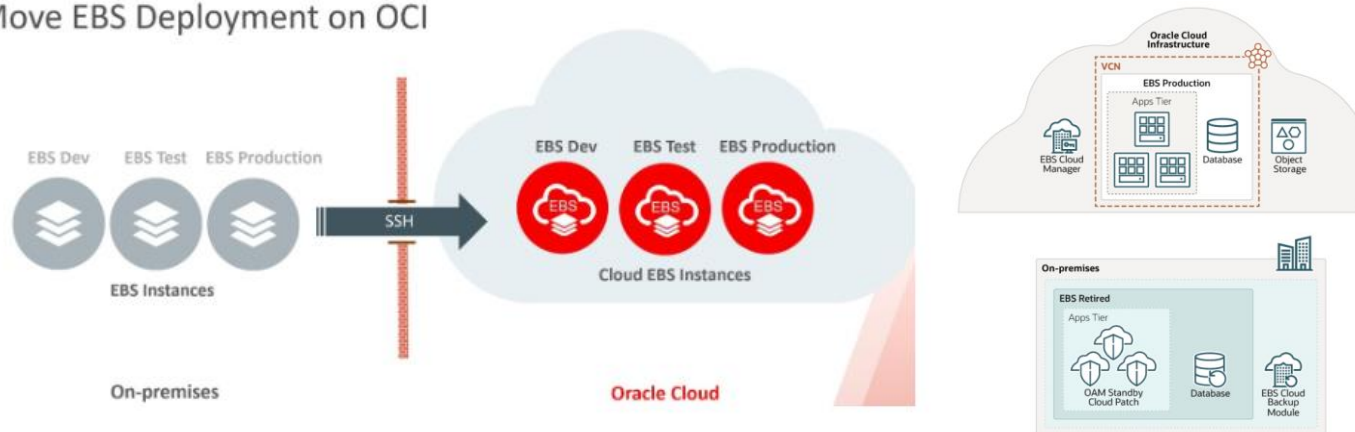

REDUCED DOWNTIME LIFT & SHIFT

In this method, we will ensure that our on-premise Oracle E-Business Suite environment is migrated to Oracle Cloud Infrastructure with minimum downtime for mission-critical systems.

- Verify Prerequisite for Lift and Shift
- Prepare the Source Oracle EBS environment
- Deploy Oracle EBS Suite Cloud Manager
- Install the Oracle EBD Cloud Backup Module
- Create an advanced configuration Parameters file (*Optional*)
- Create a Backup with the EBS Cloud Backup module

Move EBS Deployment on OCI

Please consider getting rid of complex & expensive on-premises infrastructure.

Enjoy the flexibility of on-need basis on-demand instant provision of Infra on Cloud for a required period.
